

Lifelong learning

13/12/2020 02:26 by PaulMedia [PM] Administrator

After a few years of hard work beside "normal" work, Paul Krier, owner-operator of PaulMedia has received its diploma as technician in computer science by the Luxembourg government, Chamber of Commerce and Chambre des Salariés via the so-called VAE way.

So 2020 was not completely wasted as it allowed not only to update knowledge from 1998 to this day but also to get it officially validated after a period during which computer science and especially web technologies developed extremely fast.

Combining technical and editorial skills is essential when setting up web projects. Add social media and you will be on the right track to get your online business growing.
